

■ 3ds Max + Photoshop — Drone 360° Demo

Rendered Model Integration in Drone 360° Image

Nuzm Solutions | Prototyping Group | Corona Renderer v11 | 2026

Project Overview

This project demonstrates the integration of a photorealistic 3D drone model rendered in 3ds Max with Corona Renderer into a real 360° aerial drone photograph using Adobe Photoshop. The workflow involves polygonal modeling, PBR material setup, spherical camera rendering, and advanced compositing techniques to seamlessly blend the CG drone into the real environment.

Demo Screenshots

Render Settings

Parameter	3ds Max Settings	Photoshop Settings
Renderer/Mode	Corona Renderer 11	Camera Raw Filter
Resolution	8192 x 4096px	16-bit/channel
Camera Type	Spherical (360°)	Equirectangular
Sampling	Pass Limit: 50	Blend: Normal + Overlay
GI Mode	UHD Cache + PT	Shadow: Multiply 45%
Output Format	EXR + PNG Alpha	JPEG 8K 360°
