

DEMO: 3D CAD DESIGN

MOBILE STAND

HERO RENDER:

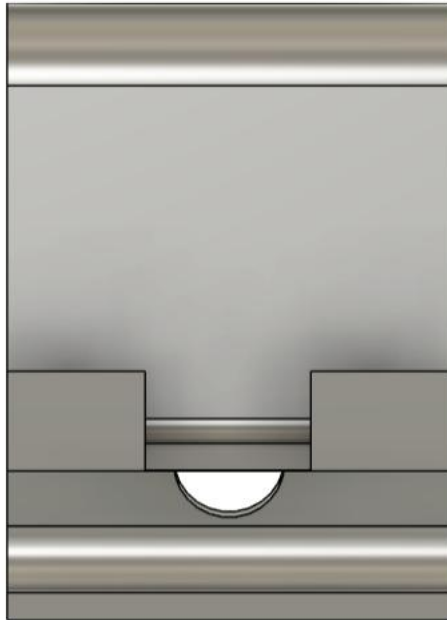

Design Overview:

This design is ergonomic and functional it holds the phone at a stable angle without any adhesive or clip, relying purely on gravity and the shape's geometry.

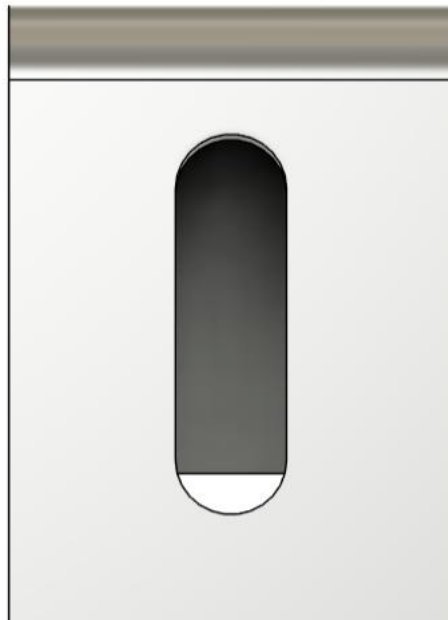

- **Base:** Flat solid slab keeps the stand stable on a desk.
- **Curved back:** C-shaped support that holds the phone at a comfortable viewing angle.
- **Front slot:** Small U-shaped groove where the phone's bottom edge sits, so it doesn't slide.
- **Built using:** Sketch → Extrude (for base and curve) → Cut (to create the phone slot)
